

I find that XM radio traffic and weather are the most comprehensive in this area. The New York stations do not report on the areas that I travel in and the New Jersey stations do not report on the areas I travel in. XM is the only service that provides me with the information I need to make accurate decisions as to which roads I should use in my daily, 30 mile each way, commute. I waited a long time for this service. Please do not allow it to be removed.
